

Currently K-Love is serving tens-of-thousands of homes in my area with family-friendly radio programming. K-Love supports wholesome values and has a positive and encouraging impact on communities across America. It would have a very detrimental effect on our community and communities across the country to be displaced with LPFM type stations providing other type programming. Please reconsider your position of possible doing away with national programming via FM translators and replacing them with LPFM. That type of move would definitely be the wrong thing to do.
